FOR AFOs / DAFOs

# FASTENER / LOCKING SYSTEMS FOR AFOs / DAFOs

AFOs and DAFOs require most accurate fit in order to perform optimally with the human body and to compensate lost biomechanical functionality. With Perpedes' fastener and locking systems, AFOs and DAFOs achieve the necessary, finely adjustable and secure fit that can even be operated single handed. Powerful and resilient. Available in various strap and buckle designs and in two different widths for best possible treatment solutions.
